

Individual Course Work

Write a C code for program for hospital billing systems that prompts a user to input **Patient Name**, **Case diagnosed**, **Consultancy fee**, **Admission fee**, **Number_of_Day_admitted** and perform computation of the bed fee as **product** of **Number_of_Day_admitted** and **rate per day**, Total Bill is the Summation of all fees.

The rate for Bed fees will be charged as per the table below

Number-of-Days	10 and above	7 and above	4 and above	Otherwise
Rate Per day	45000	60000	80000	100000

Expected Output:

BUHINGA HOSPITAL BILL SYSTEM		
****AUTOMATED PATIENTS RECEIPT*****:		
Patients Name	:	
Case diagnosed	:	
Consultancy fee	:	
Admission fee	:	
Days of admission	:	
Bed Fees	:	
Total Bill	:	UGX
